CONSULTING & TECHNOLOGY STRATEGY LEADER

Executive Advisory | Enterprise Transformation | Technology Modernisation

PROFESSIONAL SUMMARY

Consulting and technology strategy leader with 15+ years in healthcare technology and nearly 15 years with Oracle Health/Cerner. Advises executive, clinical, operational and technology leaders on enterprise transformation, digital strategy, technology modernisation and future-state delivery. Experienced leading strategic discovery, executive workshops, options analysis, roadmaps, governance and investment planning, then translating strategy into practical multi-site transformation programs. Combines deep digital health and enterprise systems expertise with consulting practice leadership, commercial awareness and a record of building high-performing teams and reusable delivery methods.

CORE CAPABILITIES

- Technology Strategy
- Enterprise Transformation
- Strategic Discovery
- Future-State Operating Models
- Business Case Development
- Technology Governance
- Commercial Scoping
- Consulting Practice Leadership
- Executive Advisory
- Digital Strategy
- Executive Workshops
- Technology Roadmaps
- Options Analysis
- Benefits Realisation
- Proposal Development
- Cross-Functional Leadership

CAREER HIGHLIGHTS

- Led and contributed to 40+ healthcare technology projects across Australia, North America, Europe, the Middle East and the Caribbean.
- Secured and led a \$200K executive-sponsored Proof of Concept by reframing a regulatory requirement as a broader enterprise transformation opportunity, positioning a potential \$1M+ expansion.
- Advised executive, clinical, operational and technology stakeholders on transformation strategy, delivery approaches, governance, investment priorities and future-state integration.
- Led multidisciplinary program teams of 20+, directly managed up to 10 consultants and mentored more than 20 professionals.
- Created consulting methods and governance frameworks adopted across teams in 10+ countries.
- Developed automation that reduced manual configuration effort by 16+ hours per implementation site.

PROFESSIONAL EXPERIENCE

DIGITAL HEALTH COLLABORATION | 2026–Present

- Collaborating with Women in Digital Health Leadership Program alumni to explore potential solutions for a Primary Health Network workforce platform designed to help staff access education, tools, resources and digital literacy support.
- Contributing to problem definition, stakeholder needs analysis, option evaluation and recommendations for next steps.

ORACLE CORPORATION (formerly Cerner Corporation) | 2011–2025

Global healthcare technology organisation delivering enterprise digital health, interoperability, clinical and ERP-integrated solutions.

Senior Consulting Manager / Consulting Technical Manager / Lead Consultant | 2021–2025

- Facilitated executive discovery workshops and future-state assessments to clarify business problems, strategic priorities, target outcomes and phased transformation pathways.
- Prepared strategic options, recommendations, technology roadmaps and delivery approaches to support executive decisions, funding discussions and investment priorities.
- Partnered with enterprise architecture, product and engineering leaders to align business requirements, platform capabilities, integration strategy and implementation feasibility.
- Developed value propositions and commercial approaches for complex transformation opportunities, supporting proposals, estimates and Statements of Work.
- Built consulting capability through coaching, structured knowledge sharing, reusable methods and succession planning.

- Led enterprise healthcare transformation, technology modernisation and implementation programs across multi-hospital environments, with accountability for delivery governance, solution strategy, stakeholder alignment, resource planning and customer outcomes.
- Partnered with executive, clinical, operational, product, engineering, sales and technology stakeholders to translate complex priorities into practical strategies, implementation plans and scalable solutions.
- Managed portfolios of up to seven concurrent enterprise engagements, balancing scope, timelines, risks, dependencies, resources and commercial commitments.
- Led multidisciplinary program teams of 20+ and regulatory deployment teams of 30+, while directly managing up to 10 consultants and mentoring more than 20 professionals.
- Secured and led a \$200K executive-sponsored Proof of Concept, positioning a potential \$1M+ expansion opportunity across 16 hospitals and health services.
- Developed and secured approval for an internal automation initiative that reduced manual configuration effort by 16+ hours per implementation site, improving delivery efficiency and reducing implementation risk.
- Established governance, decision pathways, executive reporting and escalation mechanisms for complex and at-risk engagements, strengthening delivery confidence and stakeholder alignment.
- Supported business development through strategic discovery, proposals, commercial scoping, delivery estimates, Statements of Work and expansion planning.

Manager / Senior Consultant | 2016–2021

- Led complex healthcare technology implementations and transformation initiatives across Australia, North America, Europe, the Middle East and the Caribbean.
- Appointed Global Knowledge Leader for Oracle Health Clinical Inventory Management and Perioperative solution streams, influencing implementation standards, product direction and strategic customer engagements.
- Led Australia's first Oracle Health and ERP-integrated surgical inventory deployment, generating 3,000+ contracted consulting hours and establishing a strategic reference client.
- Partnered with product managers, engineering teams and healthcare stakeholders to design point-of-use inventory scanning, GS1 barcode and UDI-enabled traceability capabilities.
- Led enterprise integration initiatives across EMR, ERP, inventory, financial and third-party platforms using HL7, XML and EDI workflows.
- Directed regulatory deployment teams of 30+ professionals to deliver UDI-related initiatives across more than 30 healthcare organisations before mandated deadlines.
- Developed project frameworks that reduced deployment time by 30% while protecting delivery quality and avoiding financial penalties.
- Led competitive dialogue, bid support, demonstrations and commercial scoping that contributed to first-in-country market entry and international growth.
- Integrated clinical inventory, ERP and robotics solutions, improving efficiency and eliminating the need for one full-time operational position.

Team Lead / Solutions Architect | 2013–2016

- Led end-to-end healthcare technology implementations from requirements gathering and solution design through configuration, testing, training, go-live and optimisation.
- Designed a repeatable consulting delivery framework recognised internally for innovation and collaboration.
- Developed onboarding and training programs that accelerated consultant capability and improved delivery consistency.
- Acted as a solution architecture and workflow advisor across perioperative, anaesthesia, scheduling and clinical inventory environments.
- Advanced rapidly through consulting roles while leading international client engagements across North America, Europe and the Caribbean.

Senior Delivery Consultant / Delivery Consultant | 2011–2013

- Configured, tested and deployed Oracle Health clinical and operational solutions across hospital and health-system environments.
- Facilitated workflow analysis, requirements validation, training and go-live support across international client engagements.
- Investigated configuration, workflow and interface issues and documented findings for engineering and client teams.

REPRESENTATIVE ENTERPRISE ENGAGEMENTS

Enterprise digital transformation and SAP integration: Led an executive-sponsored proof of concept evaluating future-state integration between Oracle Health clinical workflows and SAP S/4HANA supply chain systems, incorporating implant scanning, GS1 barcode parsing, UDI readiness, governance and phased expansion planning.

First-in-country surgical inventory integration: Shaped and delivered Australia's first Oracle Health and ERP-integrated surgical inventory deployment, generating 3,000+ contracted consulting hours and establishing a strategic reference client for future growth.

Province-wide clinical and ERP transformation: Delivered multi-million-dollar transformation across a Canadian provincial health system, integrating perioperative workflows with Oracle PeopleSoft inventory, procurement, Accounts Payable, General Ledger, EDI 850/855 transactions, medication cabinets and robotics.

Enterprise health-system standardisation: Supported enterprise transformation across a 30+ hospital integrated health network, aligning clinical inventory, perioperative, ERP and financial workflows to improve standardisation and operational visibility.

GS1 and UDI traceability: Designed barcode-enabled implant and device-tracking workflows using GS1 standards and UDI principles, reducing recall response times from 72 hours to near real-time and improving point-of-care traceability.

Regulatory deployment leadership: Led regulatory deployment teams of 30+ across more than 30 healthcare organisations, establishing repeatable methods, readiness activities and governance to support compliant capture and transmission of implantable device information.

Global consulting capability: Led a global community of solution consultants across 10+ countries, standardising methods, sharing lessons learned and developing reusable delivery assets that improved quality and consistency.

LEADERSHIP & PRACTICE DEVELOPMENT

- Directly managed up to 10 consultants, including hiring, performance management, development planning, resource allocation and utilisation forecasting.
- Led multidisciplinary program teams of 20+ and regulatory deployment teams of 30+ across concurrent, multi-site initiatives.
- Mentored and developed more than 20 consultants through onboarding, coaching, knowledge sharing, cross-training and succession planning.
- Built structured onboarding processes that achieved 100% compliance and improved consistency for new team members.
- Created a feedback-driven culture that improved collaboration and contributed to a 5% reduction in attrition.
- Developed leadership capability and succession plans that supported promotion of team members into team-lead roles.
- Led a global community across 10+ countries, standardising consulting practices and strengthening delivery quality.

TECHNOLOGY & DOMAIN ENVIRONMENT

Clinical and EMR: Oracle Health (Cerner Millennium); perioperative; anaesthesia; scheduling/ESM; endoscopy; interventional radiology; cardiac catheterisation; clinical documentation; clinical inventory.

ERP and Enterprise: SAP S/4HANA; Oracle PeopleSoft ERP and Financials; Infor/Lawson; McKesson; inventory, procurement, invoicing, Accounts Payable and General Ledger.

Interoperability: HL7 v2; XML; EDI 850/855; Rhapsody Integration Engine; interface requirements, message validation and troubleshooting; FHIR awareness/working knowledge.

Traceability and Automation: GS1 barcodes; UDI; point-of-use scanning; implant and device traceability; Pyxis; Omnicell; BoxPicker robotics.

Delivery and Collaboration: Jira; Confluence; Azure DevOps; Microsoft 365; Microsoft Copilot; ChatGPT; Claude.

EARLIER COMMERCIAL EXPERIENCE

Account Manager, Lesaffre Yeast Corporation / Red Star Yeast | 2008–2011

- Managed key client accounts, built long-term customer relationships and identified opportunities to expand market share.
- Used consultative engagement to understand customer needs, present tailored solutions and support revenue growth and retention.
- Resolved complex customer issues and maintained high levels of client satisfaction.

Administrative Assistant | 2006–2008

- Supported scheduling, records, correspondence, reporting and operational coordination while identifying opportunities to improve administrative processes.

EDUCATION, CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Women in Digital Health Leadership Program, 2026 Cohort — Completed | Australasian Institute of Digital Health
- Certified Health Informatician Australasia (CHIA) | Australasian Institute of Digital Health
- Master of Science, Management Information Systems | University of Wisconsin–Milwaukee | 2010
- Bachelor of Business Administration, Marketing & International Business | University of Wisconsin–Milwaukee | 2008
- Study Abroad, International Business | Auckland University of Technology | 2006
